- UI/UX Designing (Figma)

PROJECTS

Lost & Found Website.(Ongoing)

- MERN-Stack Development

- Developed a city-based platform where users can post and search lost & found items.
- Implemented user authentication and item management features.
- Created an Admin Panel to manage users and posts.

E-Commerce Application

- React.js Development

- Developed a responsive e-commerce frontend with product listing and search functionality.
- Implemented add-to-cart feature and dynamic product rendering using JSON data.
- Designed interactive UI for better user experience.

City Black Spot & Road Safety Portal

- React.js Development

- Developed a frontend portal displaying city black spots and road safety information.
- Integrated official links to access road and vehicle-related services (license, registration, etc.).
- Designed UI to showcase road signs and their meanings for public awareness.

Event Management System

- MERN-Stack Development

- Developed a full-stack event management platform for hosting and booking event tickets.
- Implemented ticket booking using mobile number authentication.
- Built an Admin Panel with sub-admin management and discount functionality.

Personal Portfolio Website

- React.js Development

- Designed and developed a responsive personal portfolio website to showcase skills and projects.
- Integrated sections for About, Projects, Contact, and live project links.
- Implemented modern UI design with smooth navigation and interactive elements.
- Deployed online at <https://portfolio-kohl-nu-14.vercel.app/> for public access.
